

# EASTBAY 44

GRAND BANKS YACHTS

## EASTBAY 44

---

The classic Eastbay 44 offers comfortable and efficient cruising, along with sheer beauty and craftsmanship without compare. Our more than 60 years of boatbuilding shines through in every detail, from the tight-grain Burmese teak to the purposefulness of an uncluttered helm. Legendary Downeast styling provides a versatile base for both relaxing jaunts and more adventurous cruises exceeding 30 knots, and the spacious interior features ample seating, overnight accommodations for 6 people and entertaining space for even more. Modern amenities provide at-home comfort on both day trips and extended cruises alike, with an expansive swim platform off the broad and deep cockpit that brings you closer to the water and makes boarding easy.

## A PROUD HERITAGE

Since 1956, Grand Banks has built stunning yachts with classic designs, supreme comfort and precise detailing. In 1993, Grand Banks introduced the world to production Downeast express cruisers with the venerable Eastbay 38, and defined graceful yachting for generations of boaters. A new era has begun at Grand Banks, and our brilliantly designed yachts lead the industry in performance and design.

## A BOLD FUTURE

The Eastbay 44 is the sleek, modernized evolution of our classic Downeast line. Behind our updated build quality is impressive power and efficiency. Our exceptional team of designers and craftsmen employ the latest techniques to deliver enhanced power and seakeeping. The latest in high-tech construction techniques ensure every Eastbay is lighter, stronger and faster.

1. The wide-open interior features power windows and gleaming teak detailing.  
2 & 3. Multiple staterooms with comfortable accommodations mean up to 6 guests can spend the night.  
4. The sleek and spacious heads feature a shower and vanity with contemporary finishes.

## CLASSIC DESIGN WITH A MODERN TWIST

Enduring tradition and classical styling are woven into every yacht we build. The EB44's clean, classic lines and impeccable craftsmanship remain even as modern build techniques update performance, quality and efficiency. A pristine, spacious engine room leads to both a perfectly balanced vessel and to vastly more volume in the yacht's living spaces, including a jaw-dropping three staterooms and two roomy heads.

## POWERFUL PERFORMANCE

The Eastbay 44 comes equipped with a large centered and baffled fuel tank to achieve ideal weight distribution. The powertrain is designed around high-performance 435-horsepower Volvo Penta IPS600s that deliver incredibly low RPM response, enable precision maneuverability and complement the yacht's long-range ability.
